

## Job Description

For established German and Swiss Companies we are looking for:

### *Software Engineer Test/Test Automation (m/f)*

**Level: Junior, Senior, Project Manager**

**Locations: Germany, Swiss**

#### Responsibilities:

- Develop test cases (web services, database setups, eclipse-based IDE, mobile client)
- Arrange, execute and check integration, acceptance and performance tests
- Implement black- and white-box quality assurance strategies, test plans and test specifications
- Analyze requirements and specifications in terms of quality parameters like testability
- Analyze, reproduce and report software defects during development process
- Work in a dynamic team oriented environment using agile methodologies

#### Requirements:

- Degree in Computer Science, or equivalent
- Minimum of 2 years work experience in software engineering with a focus on test automation
- Strong experience in programming e.g. Java/JavaScript
- Experience in automation tools
- Experience in testing of either web services, database setups, mobile clients and/or an eclipse-based integrated development environment (IDE)
- Experience in testing techniques like BDD, boundary/equivalence class analysis, mocking and coverage criteria
- Knowledge in quality assurance processes and test methods
- Proven record in professional defect-tracking and knowledge in standard tools like Jira
- Understanding of agile methodologies like test driven development, continuous integration, agile testing
- Knowledge in virtualization and/or build tools is a plus
- Strong English communication skills to work within an international team
- Ability to quickly learn and apply new ideas
- German nice to have

#### The offer:

- Employment in modern growing company with good corporate culture
- Attractive compensation depends on your skills and experience
- An experience inside of passionate team working for an international project using several technologies that will help you to grow professionally and personally
- Company smart phone and laptop
- Excellent carrier opportunity to management level
- In some of the companies: additionally participation in the success of the company via company stock options!
